

James Oehring

Data Driven Technology Executive | Enterprise AI Strategy and Governance

Overland Park, KS • 816.225.8592 • james@ringldr.com • [linkedin.com/in/james-oehring](https://www.linkedin.com/in/james-oehring)

EXPERIENCE

Stealth (AI Startup) — Remote

Chief AI Officer · September 2025 – Present

- Stood up the AI Office and built the enterprise AI roadmap and AI strategy for the organization
- Owned the AI operating model across the full AI initiative lifecycle: ideation and intake through proof-of-concept, pilot, and production deployment. Got 15+ Generative AI use cases into production through hands-on AI and machine learning implementation
- Built agent harnesses and multi-agent orchestration with real-time guardrails. Designed tiered memory, recall, tool calling, and dispatch so autonomous workflows stay compliant under load
- Built ingestion pipelines for PDF, email, speech-to-text, Word documents, and OCR. Standardized extraction, categorization, and routing into the company brain
- Deployed on-premises localized models with strict data protection controls. Trained and fine-tuned organization-specific models per tenant domain and vocabulary
- Designed feedback protocols tied to operational metrics plus ongoing domain-specific research loops. Agents self-correct over time instead of needing constant manual retuning
- Scored use cases on return on investment, technical feasibility, and risk management. Ran go/no-go and funding decisions tied to business value and benefits realization
- Built a power user network (AI Champions) across non-technical business units. Upskilled 200+ people across 11 companies on prompt engineering, low-code AI tooling, and multi-agent workflows. Business adoption moved ~40% faster than baseline
- Co-authored the Responsible AI Policy with legal and compliance. Put AI ethics, model safety, and data privacy guardrails in place, including automated checks for bias and hallucination rates
- Led strategic and operational planning with executive presence. Presented portfolio updates to the AI Steering Committee on progress, risk, compliance, and spend. Wrote business cases for capital and operating expense initiatives
- Managed a \$5 million+ portfolio (budget management). Partnered with information technology shared services on vendor management and model provider contracts. Routed workloads across cloud foundation models and on-premises deployments

Avirodha Consulting Group / ringldr — Kansas City, MO

Founding Operating Partner · June 2018 – Present

- Built machine-log predictive maintenance for a commercial manufacturing client (gasket and metal plant). Designed, deployed, and trained operators. Cut machines experiencing downtime by 20%. On-time maintenance compliance went from under 50% to 90%
- Built delivery velocity forecasting for the same commercial manufacturing client. Surfaced timeline risk earlier so the plant could staff ahead of crunch periods and late deliveries dropped significantly
- Primary executive liaison on enterprise integration work. Gathered business requirements, translated strategy into roadmaps, and kept stakeholders aligned on prioritization and risk
- Built a project health tracking framework that improved on-time delivery by 22% and cut budget overruns by 18% in year one
- Ran enterprise integration projects including electronic health record implementations. Held vendors to Health Insurance Portability and Accountability Act and System and Organization Controls 2 requirements through selection and delivery

Cornerstones of Care — Kansas City, MO

Director of Technology · June 2019 – February 2022

- Ran cross-functional governance forums and executive steering committee sessions with legal, IT, and business unit leaders. Owned prioritization, risk assessment, and go/no-go calls for a 600+ employee multi-site organization

- Built the IT department from zero. Put enterprise technology governance and program governance in place for 600+ employees
- Cut vendor spend by \$245,000+ annually through contract work and request-for-proposal discipline. Linked spend to compliance outcomes and user satisfaction metrics
- Started a Voice of the Customer program for IT and EHR services. Embedded Agile and DevOps. Led organizational change management to pick up delivery velocity
- Built a cybersecurity awareness program with executive leadership. Phishing click-through rates fell 50% within 12 months

GEHA — Lee's Summit, MO

Project Manager / Scrum Master · June 2018 – June 2019

- Managed on-premises to cloud migration and stabilized hundreds of virtual desktop infrastructure environments
- Ran Agile delivery on a customer experience initiative for 2 million+ members. Aligned customer satisfaction and Voice of the Customer metrics to business goals

Netsmart Technologies — Overland Park, KS

Project / Program Manager · June 2014 – June 2018

- Managed 150+ enterprise electronic health record implementations (\$100 million+ portfolio). Regular presenter to executive steering committees on prioritization, risk management, and go/no-go decisions
- Led enterprise digital transformation work at scale across the portfolio
- Delivered the State of Alabama Reporting Module with state and federal stakeholders on compliance reporting and program governance

EDUCATION

University of Kansas, Lawrence, KS

Master of Social Work · 2013

Northwest Missouri State University, Maryville, MO

Bachelor of Science, Psychology and Sociology · 2011

CERTIFICATIONS

Certified Scrum Master and Certified Product Owner, Scrum Alliance · 2019

SKILLS

Agentic Systems and Harness Engineering: Agent harness design, multi-agent orchestration, guardrails architecture, tiered memory and recall, tool calling and dispatch, human-in-the-loop workflows, self-healing agent feedback loops, metric-driven performance protocols, domain-specific contextualized research

Artificial Intelligence and Enterprise Strategy: AI Office operations, AI roadmap development, AI strategy, AI operating model, AI initiative lifecycle, AI Center of Excellence, use-case prioritization, benefits realization, business adoption, enterprise digital transformation, Generative AI, AI and machine learning implementation, digital product management, data science, knowledge-graph retrieval, emerging AI technologies

Data Ingestion and Model Operations: Multi-media extraction and standardization (portable document format, email, speech-to-text, word processing documents, optical character recognition), ingestion categorization and routing, on-premises localized model deployment, organization-specific model training and fine-tuning, strict data protection controls, artificial intelligence financial operations

Governance and Compliance: AI Steering Committee participation, executive governance, Responsible AI, AI ethics, model safety, data privacy, risk management, risk assessment, organizational change management, Health Insurance Portability and Accountability Act, System and Organization Controls 2

Leadership and Operations: Executive presence, stakeholder management, cross-functional leadership, strategic planning, operational planning, budget management, vendor management, business case development, business requirements, project management, Agile, Scrum, DevOps, software development lifecycle, information technology shared services partnership

Platforms and Tools: LangGraph, CrewAI, AutoGen, Neo4j, NeMo Guardrails, Llama Guard, Azure OpenAI Service, Amazon Web Services Bedrock, self-hosted open-source models, predictive maintenance, application programming interface integration
